

RETROFIT SOLUTION

C.R. ONSRUD[®]

Retrofit with
FANUC

Why Retrofit?

On a tight budget? Retrofitting your machine with a FANUC controller servo, and spindle drives is the most cost-effective way to transform your dated system into a high-performance control system. The FANUC retrofit extends the life of your C.R. Onsrud machine without the risk of failures associated with outdated operating systems.

Premium Service Warranty

When you choose our retrofit solution, you receive a comprehensive 2-year premium service warranty covering all FANUC components, ensuring peace of mind and the longevity of your investment.

What's Included

All new parts to elevate your machine's performance and reliability*

**Parts listed here may or may not be included for every machine. Please contact our parts team to learn more.*

Enhanced Performance

FANUC

A brand you can trust with over sixty years of CNC expertise

- Increase your machine's value by upgrading its aging control unit.
- Accelerate your cutting speed with the latest CNC control technology
- Expand your machining capability with fully advanced servo and spindle drives
- Gain lifetime parts availability and cutting-edge technology from FANUC
- Operate your machine with a new easy-to-use touch screen.
- Improve connectivity into IT networks

Expandable

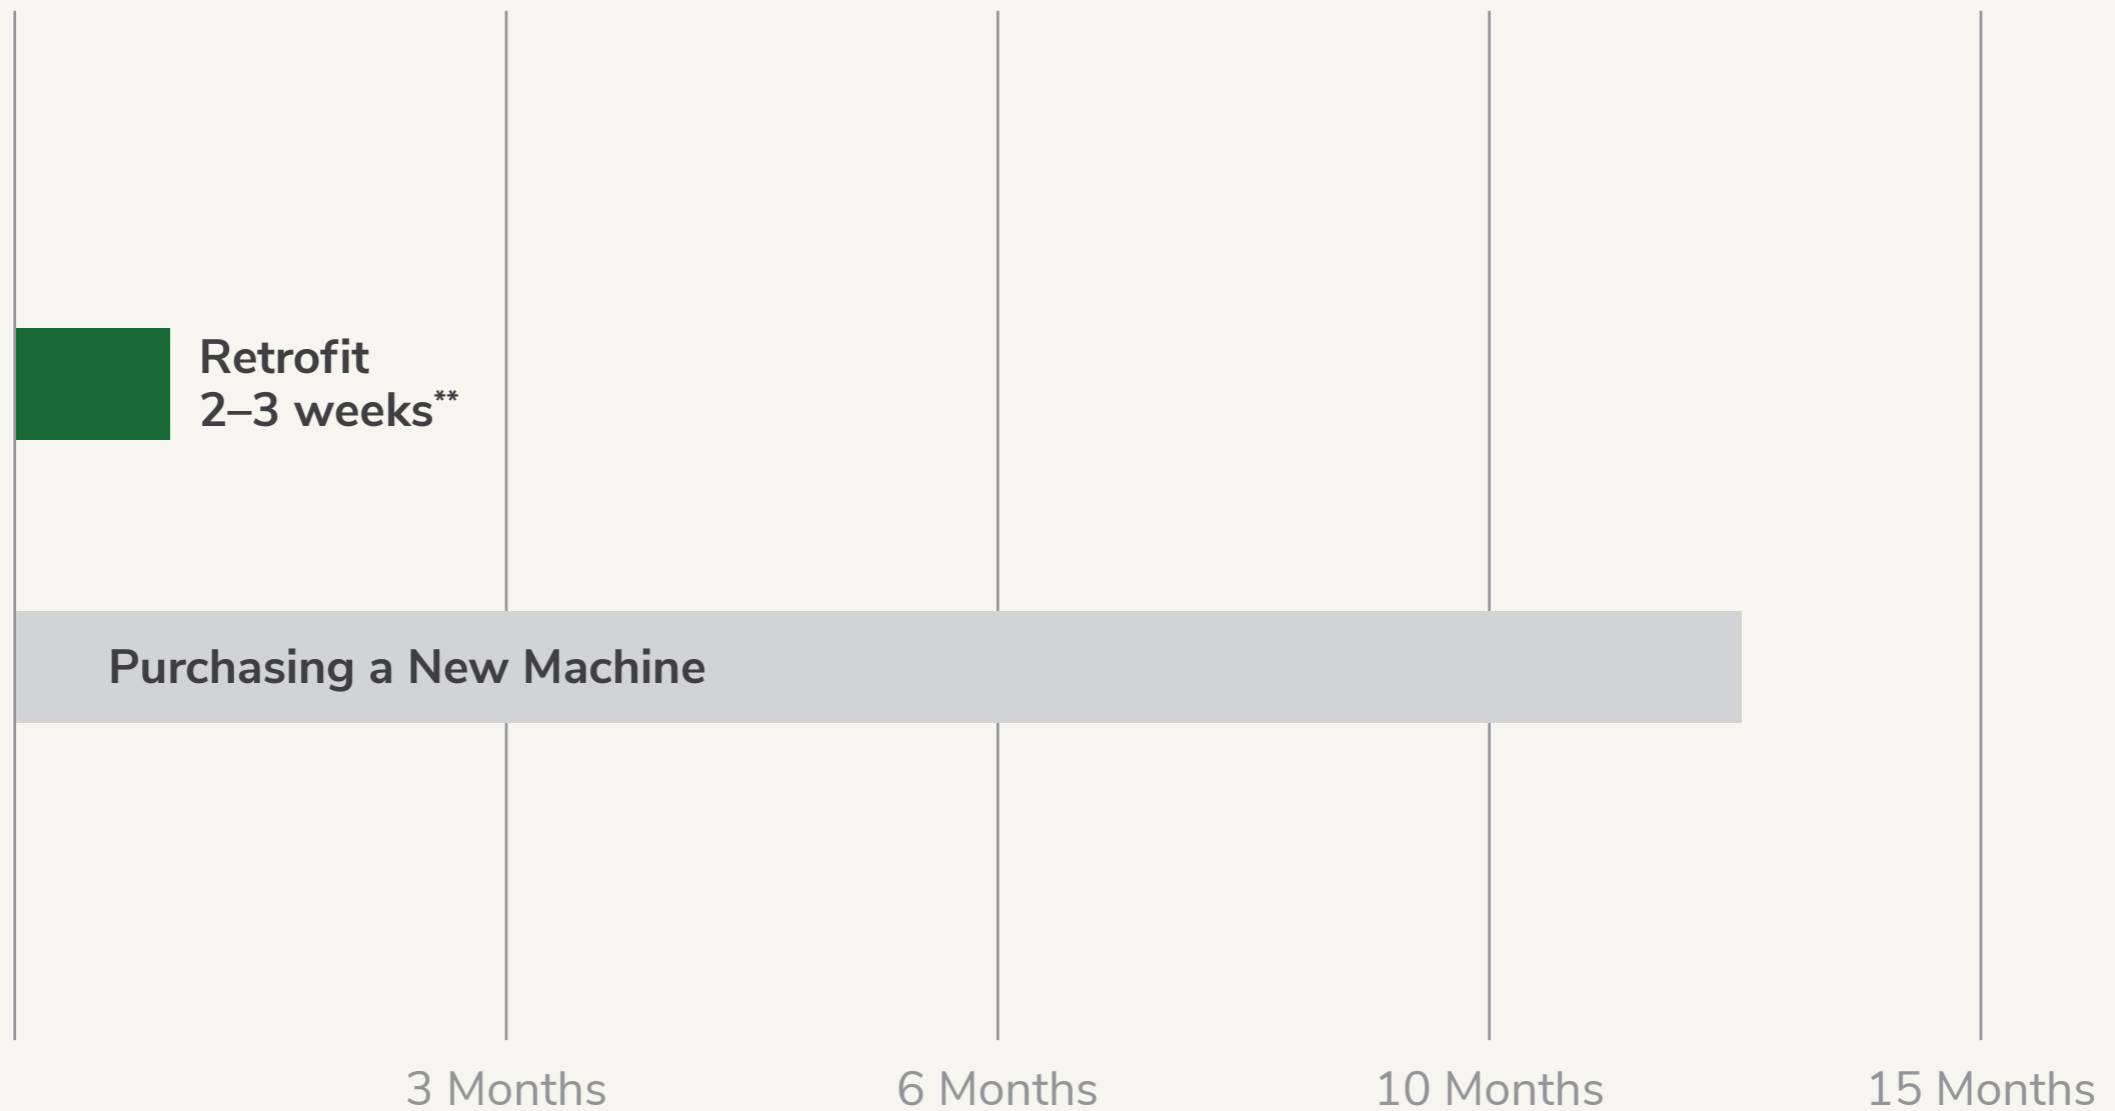

Easily add features like Osync[®] Machine Analytics and take the guesswork out of your production.

- Monitor performance
- Receive timely reports via email or text
- Diagnose and repair issues up to 5x faster
- Automate maintenance reminders
- Stay ahead of potential issues to prevent costly repairs
- Grow your business with easy-to-understand, actionable insights

Faster Lead Time

Production Downtime*

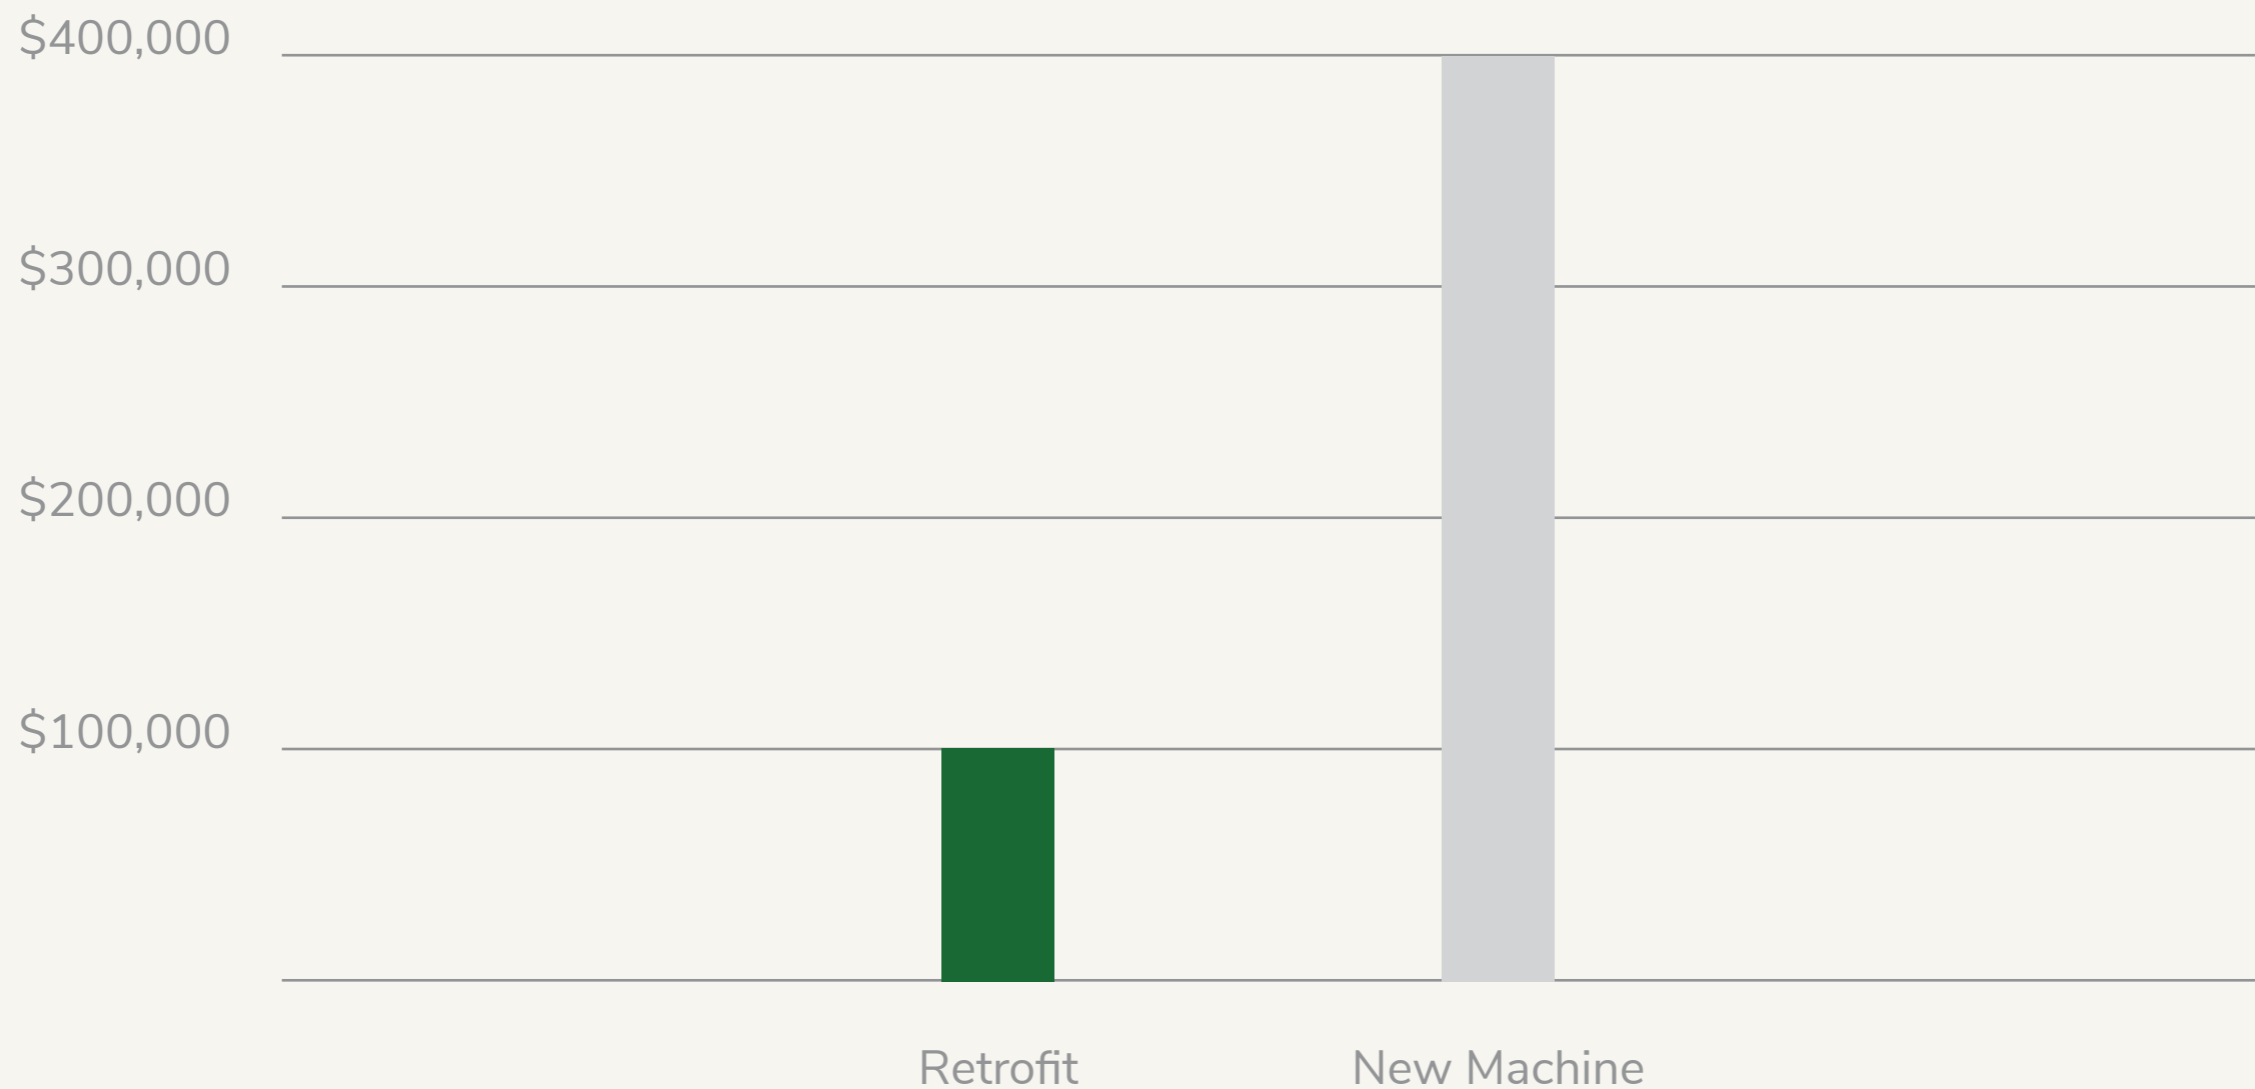

*Based on average lead time for new machines.

**Times may vary depending on the number of options on the machine or complexity.

Cost Savings

Retrofit cost vs new machine*

A retrofit typically costs a fraction of the price of purchasing a new machine.

**This is an average. Please contact our parts team to get a quote for more accurate cost savings.*
